### PERSONAL STATEMENT

Creative detailed-oriented, result-driven Front-end developer with 3+ years of experience in diverse and large customer-based projects. A proven track record of improving project load performance and user engagement after redesigning and implementing scalable solutions for complex business challenges. Consistently putting in extra effort to ensure project success even with tight deadlines and constraints. Specialize in Angular, TypeScript, web app development, UI design, and Scrum. Also, an eye for UX, and a passion for learning new technologies as needed for projects (e.g., react/ next.js/ etc.). Collaborate in task management between team members and, cooperation cross-functionally with technical teams and other team members across all phases of the software development lifecycle.

---

### SKILLS

- **Frontend Development** | Angular, TypeScript, ES6 (JavaScript), RxJS, NgRx, Angular Schematics, Bootstrap, SASS/SCSS, CSS/CSS3, HTML5, ESLint, Restful APIs, OOP, SOLID
- **UI Design** | Material UI Design, Designing Needed UIs, Sketches, Wireframes, Figma.

- **Creative Skills** | Photoshop, Creating Brand Identity, Familiar with Video Editing Software and Project Branding

---

### WORK EXPERIENCE

#### Frontend Developer / Sadad Informatics Corporation

Sep 2021 - Present / Tehran

- **BMI's (Bank Melli Iran) account delegation (firoozeh.bmi.ir)** | Developed front-end technical infrastructure and components under very tight deadlines, contributing to BMI becoming one of the first banks to offer online account delegation.
- **BMI's direct debit (directdebit.bmi.ir)** | Led the redesign and restyling of BMI's direct debit, including creating a new landing page and user agreement page, resulting in a decrease in help desk calls."
- **BMI's charge site (echarge.bmi.ir)** | In collaboration with the UI team, I led the development of BMI's charge site's new UI and designed email receipt, resulting in a sales increase within 3 months.
- **NeoFam** | Developed the front-end technical infrastructure and necessary components for BMI's new NeoFam application panel.
- **BMI's design system (Miras)** | As a key member of the development team, I developed BMI's first design system, including components, unique font icons, landing, and branding. I also managed the workflow between team members, delivering the project within a tight time frame.
- **Sadad Academy (academy.sadad.co.ir)** | Developed key frontend features of a complete CMS for Sadad Academy, meeting the project's challenging time frame and contributing to its success.
- **Improve schematics of the team projects** | Improved team schematics to speed up the development process
- **Optimized translation infrastructure** | Optimized projects translation and change the way team used translation in projects
- **Migrated to ESLint** | Successfully migrated all existing and new projects from deprecated TSLint to ESLint and implemented Husky to ensure consistent code quality across the team, resulting in improving efficiency and collaboration.
- **Sayad check (sayad.bmi.ir)** | Improved BMI's Sayad check UI

- **InProgress improvements** | Currently migrating projects from Ngx-translate to Angular localization and testing Nx mono-repo on new projects
- **Additional Contributions** | In addition to technical contributions, assist team members and help onboard new members by familiarizing them with team projects and conducting code reviews (not limited to only new members). Also designed and improved existing project UIs, and created logos and branding for team projects such as Pallas, Firoozeh, Miras, Neofam, and Sadad Academy's CMS (Nahal).
- **Pallas** | Wrote proposal for Pallas and create needed brandings and sketches.

### Frontend Developer / Management and Planning Organization

Dec 2018 - Dec 2020 / Semnan

- **WIFI Portal** | Developed the WIFI portal template based on Mikrotik variables and documentation
- **Survey Pages** | Developed needed pages for the survey portal based on CMS documentation
- **Administrating MPO's Site** | Administered the MPO's main site and developed new pages as needed

### Android Developer / Freelance

Dec 2012 - Sep 2021 / Semnan

- **Ghoghnose Tower** | Developed and managed the Android client for Ghoghnose Tower
- **Meeting** | Developed and managed the Android client for the Meeting, a government-requested application
- **My Semnan** | Developed and managed the Android client for My Semnan, a government-requested application
- **Divar Mashahir** | Developed and managed the Android client for Divar Mashahir, a government-requested application
